

FCM delivers Travel Essentials.

FCM Travel Solutions recognise that travel can be complex and that employer duty of care extends well beyond emergency travel support. To provide a truly end to end solution and address every area of a traveller's needs, FCM's Travel Essentials provides the tools to complete a fully comprehensive travel management service.

Visa, Passport and Immigration Solutions

The penalties of non-compliance with local immigration requirements vary greatly, from personnel being refused entry into a country by border control, to civil and even criminal penalties for employers.

Visas

Our in-house Travel Visas team are based in Chancery Lane, London. The service is delivered through a combination of an online portal and offline support, with additional assistance available including organising digital photos, arranging business invitations and airport meet and greet.

Travel Insurance

Whether it's through our global preferred supplier, or working with your own preferred Insurance provider, FCM work with you to implement and oversee a tailored business travel solution so you can rest assured your travellers and your business are protected.

Travel Health

Employers have a duty of care to their employees, morally and in most instances legally. Our Travel Health services allow us to assist clients to manage and mitigate risks, and ensure their employees' health and productive well-being whilst travelling.

From recommendations for required vaccinations to bespoke medical services based on specific travel requirements, our comprehensive range of travel health solutions provide our clients with confidence and our travellers with peace of mind.

Passport Services

From first time passports, to renewals and replacements of lost or stolen passports, the FCM Travel Essentials team are on hand to provide expert management.

Immigration Solutions

The expertise of our immigration consultants can be utilised on an ad hoc basis, for review and analysis or as an ongoing management for more complex or long term requirements.

You choose the level of assistance you require:

- **Transactional** – Travel Visa and health advice provided as and when required by your business. With assistance for the application, processing and fulfilment of travel visas and the arrangement of vaccination and health consultation appointments.
- **Consultancy** – Data driven evaluation of your business needs including historic and planned travel and project specific requirements. Subsequently FCM will deliver a proposal to meet these needs.
- **Holistic** – Informed by corporate strategy, a tailored, data supported evaluation of (potential) needs will be created to outline bespoke solutions supported by technology for ongoing management of your travel and compliance requirements.

FCM Travel Essentials addresses these traditional pain points and assists with duty of care and compliance, leaving you to focus on making your travel productive.
